

Changing the home page video:

1. When you upload the video to Vimeo, take note of the Eight-Digit number assigned to your clip. For example: <http://vimeo.com/15287184> in this case, 15287184 is the number you are looking for.
2. Log into the administration site of joeharewicz.com: <http://www.yoursite.com/administrator/> using your username and password.
3. Click on Extensions->ModuleManager.
4. Select and click on "HomePageVideo".
5. On that screen, you will see a "code written" box on the right side of the screen.

Parameters

▼ **Module Parameters**

Notepad

Code written

```
<embed height="338" width="600" scale="exactfit"
type="application/x-shockwave-flash"
pluginspage="http://www.macromedia.com/go/getflashplayer"
src="http://vimeo.com/moogaloop_local.swf?
clip_id=15287184;server=vimeo.com&autoplay=0&fullscreen=1&sh
ow_portrait=0&show_title=0&show_byline=0&color=00ADEF&contex
t=user:425242&context_id=&hd_off=0&buildnum=1b72c"
play="true" loop="true" menu="false" />
```

Source of code

► **Advanced Parameters**

6. Replace the eight digit number (highlighted in the box) which follows the "clip_id=" with the Vimeo id from step 1.
6. Click Save.
